PROFESSIONAL SUMMARY

Full-Stack Developer with 1+ year of professional experience architecting and delivering production-grade web applications, ERP systems, and scalable backend services. Core expertise in Node.js, Express.js, and MongoDB, complemented by strong frontend skills in React.js, Redux, and Tailwind CSS. Recognized with the Best Full-Stack Developer Award at TechSurya IT Solutions (2025) for consistently shipping high-impact, live-user products including an enterprise ERP and a full-featured e-commerce platform.

TECHNICAL SKILLS

Frontend:	React.js, Redux, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
Backend:	Node.js, Express.js, RESTful API Design, JWT Authentication, Socket.io, Microservices
Databases:	MongoDB, Mongoose ODM, SQL (MySQL / PostgreSQL), Database Indexing & Aggregation Pipeline
Tools:	Git, GitHub, Postman, VS Code, npm, Razorpay, Stripe, API Gateway, Agile / Scrum

WORK EXPERIENCE

Full-Stack Developer — TechSurya IT Solutions

Chh. Sambhajinagar, Maharashtra | July 2024 – Present | Full-Time

- Architected and launched a live Employee Management ERP — used daily in production — covering attendance tracking, leave management, task assignment, group chat, daily reports, and Admin + Super Admin dashboards.
- Engineered RESTful APIs with Node.js and Express.js across ERP modules, e-commerce platforms, mobile app backends, and real-time vehicle location tracking services.
- Built real-time features using Socket.io for instant group messaging and live GPS-based location tracking within the ERP platform.
- Integrated Razorpay and Stripe payment gateways into e-commerce backends, managing the full order lifecycle from checkout to fulfilment.
- Crafted optimised MongoDB schemas with compound indexing and aggregation pipelines, significantly reducing query latency on high-volume datasets.
- Partnered with frontend and product teams in Agile sprints, shipping features on schedule with minimal post-release defects.

PROJECTS

1. University Management System — Full-Stack ERP Platform

React.js · Node.js · Express.js · MongoDB · JWT · Refresh Token · RBAC · Microservices · API Gateway · REST APIs

- Engineered a multi-role university platform for 9 roles — Principal, Admin Officer, Exam Controller, HOD, Faculty, Accountant, Counselor, Student, and Parent — each with scoped access and module-specific workflows.
- Developed 30+ REST API endpoints via an API Gateway across Admissions, Fee Management, Attendance, Exam Scheduling, Result Publication, Scholarship Disbursement, and Grievance modules.
- Enforced granular Role-Based Access Control (RBAC) at both API middleware and frontend route levels, eliminating unauthorized data access across all modules.
- Applied a microservices architecture to decouple core domains (Admissions, Exams, Finance), enabling independent deployment and improved scalability.
- Automated hall ticket generation with QR codes, merit-list computation, invigilator rostering, and digital certificate issuance (TC and Bonafide).
- Secured all sessions with JWT access tokens and refresh-token rotation for stateless, tamper-proof authentication.
- GitHub: github.com/Harshadbankar1596/university-management

2. ShopCart — Full-Stack E-Commerce Platform

React.js · Node.js · Express.js · MongoDB · JWT · Razorpay / Stripe · Tailwind CSS

- Built a production-ready clothing e-commerce platform with distinct Admin and User portals covering the full product-to-delivery lifecycle.
- Admin portal: catalogue management, order tracking, shipment status control, inventory oversight, and sales analytics.
- User portal: product browsing with filters, cart management, secure Razorpay / Stripe checkout, and real-time order status updates.
- Secured all routes using JWT authentication with refresh-token rotation across both portals.
- Created MongoDB schemas with compound indexing, delivering sub-100 ms response times across thousands of catalogue entries.
- GitHub: github.com/Harshadbankar1596/shopcart

EDUCATION

Bachelor of Computer Science (BCS) | Chh. Sambhajinagar, Maharashtra | 2024 – Present (3rd Year)

ACHIEVEMENTS & RECOGNITION

- Best Full-Stack Developer Award — TechSurya IT Solutions, 2025, for delivering high-impact live products under production constraints.
- Shipped 2 fully live, production applications — an enterprise ERP and an e-commerce platform — serving real end-users with zero critical downtime.
- Built and maintained real-time backend services handling concurrent users across Socket.io-based chat, GPS tracking, and payment-gateway integrations.
